

Following the Park rules of behaviour is a small effort for every visitor but a big contribution in protecting our Park environment and way of life. Help us make sure that our future generations can enjoy the same scenery we can today. By paying entry fee you support Park efforts in preserving Nature Park Lastovo Archipelago for future generations.

3. Skrivena luka: 3.7km | difficulty: 3/5 | asphalt/macadam

MAP LEGEND:
ROAD
BIKE ROUTE

Welcome to the **Nature Park Lastovo Archipelago** – the most distant inhabited island in Croatia and one of the **last 10 biodiversity treasures** of the Mediterranean Sea. Discover its mystic beauty, thick forests, fertile fields, high coastal cliffs, land and sea caves, numerous rare sea and land species and habitats.

It's a place where time has slowed down and life adapted to the slow pace of times and customs long gone on the mainland. In other words take your time and get to know locals and their ways, it's worth it.

The **Lastovo Archipelago** was declared a **Nature Park** in 2006. It consists of 46 islands, islets, rocks and reefs (the largest among them are Lastovo and Sušac) covering total area of 53 km² of land and 143 km² of sea. Its borders are lit by the stone lighthouses of Sušac, Tajan, Glavat and Struga.

Nature Park Lastovo Archipelago has a rich cultural and historical heritage - numerous **stone churches** and **chapels**, **picturesque chimneys** (*Fumari*) and the **traditional Lastovo Carnival** (*Poklod*), but one must not forget local inhabitants, who prove that the **coexistence of man and nature** is possible with developed environmental awareness.

Tourism is important sector for the island, but it can often be a threat to the nature. Goal of **Association for Nature, Environment and Sustainable development Sunce** and **Lastovo Archipelago Nature Park Public Institution** is to **manage tourism** in a sustainable way, through education and awareness rising and development, implementation and promotion of sustainability

principles. More and more tourists recognize Lastovo as a place for recreation, for enjoying local cuisine and local way of life. By going greener we are contributing to **sustainable income** for the local community and trying to give every visitor a chance to participate in **island's tradition of living with nature**.

Enjoy your stay and help us look after our clean environment by being a sustainable and responsible tourist.

LASTOVO ARCHIPELAGO:

TIPS HOW TO BE A SUSTAINABLE TOURIST

Follow the rules for safe anchoring, use techniques and materials that reduce the negative impact on sea bottom.

Get informed: many of the plants and animals surrounding you are rare, endangered and protected. Recreational fishing is allowed with Park's permit. For more information check Park's website or visit Park's office.

Don't move or damage any plants or rocks which provide homes for wildlife. If you find injured wildlife, please call Park rangers on 00385 (20) 801 252.

Take care of your safety, follow the signs and stick to footpaths.

Protect the nature and don't leave any waste in natural areas.

Be careful with the use of resources. Be water wise and do not let the tap water run unnecessarily.

Shop locally. With the use of local products (wine, brandy, olive oil, marmalade...) you contribute to local economy.

Try local dishes in local restaurants: experience our traditional food. It gives you a flavour of this area.

Be open, respectful and experience local way of living.

Be an energy saver: reduce energy by switching off lights, turning down air conditioning, avoid leaving appliances on stand-by, etc.

Reduce your footprint: when you plan your trip, consider that your choice of transport can lower carbon emissions.

When choosing accommodation, look for environmentally friendly place to stay. (<http://www.eko-partner.hr>)

Get involved: we welcome your comments about additional improvements. Visit our website (www.pp-lastovo.hr) and tell us more about your ideas.

Following the Park rules of behaviour is a small effort for every visitor with a big result for our protected area. Help us make sure that our future generations can enjoy the same scenery we can today.
